

Certificate of compliance

EC directive 2002/95/EC (RoHS) restrict the use of the hazardous substances listed below in electrical and electronic equipment.

Based on information provided by our suppliers, Paradox declares the product listed below as RoHS compliant on or after the date of this certificate.

RoHS compliant means that :

- Our suppliers have confirmed the compliance status of their component used in the present product.
- Our manufacturing processes respect the RoHS directive in the present product.
- We have put in place rigorous processes allowing us to confirm and document our conformity.

Confirmation of compliance status by our suppliers is either because the products do not contain any of the restricted substances referred to in article 4(1) of the RoHS directive at concentrations in excess of those permitted under the RoHS directive or because their removal is not technically possible and their existence in the products at levels in excess of these concentrations is allowed as one of the particular applications listed in the Annex of the RoHS directive.

The maximum concentration values of the restricted substances by weight in homogeneous materials are:

- Cadmium 0.01%
- Hexavalent chromium 0.1%
- Lead 0.1%
- Mercury 0.1%
- Polybrominated biphenyls (PBB) 0.1%
- Polybrominated diphenyl ethers (PBDE) 0.1%

Paradox has taken all reasonable steps to validate information submitted by suppliers regarding concentration values of the restricted substances in the product listed below. Such information is documented.

Product code : DG466

Description : DIRECTIONAL CEILING MOUNT DIGITAL PIR

Date : January 3, 2011

Responsible : 
Emmanuel Stathopoulos
